# **BMD-40DIN**

# DC BRUSH MOTOR DRIVER

#### Inputs for external discrete signals

- START/STOP to start and stop the motor
- DIR to control the rotation direction

• HARD STOP — emergency stop signal External signals START/STOP and DIR can be used as per the signal level or per front edge of the signal.

## Dimensions

BMD-40DIN is a driver designed to control speed, direction, acceleration and deceleration of DC brush motors.

The current limiting function protects motors from overloads.

#### **Technical parameters**

Rated current in motor phase	40 A
Phase current limitation	1 – 40 A
Short-circuit protection	100 A
Power supply:	12 – 24 VDC

## Speed control

- Internal built-in potentiometer
- Inputs for connection of an external potentiometer
- Analog voltage signal 0..5VDC
- Acceleration and deceleration rate is adjusted by the internal built-in potentiometer

## **Connection example**
