

# SMD-1.6 open kit version

## STEPPER MOTOR DRIVER

Stepper motor driver SMD-1.6 with DIN clamp is manufactured in an open case. A frameless version of the driver is also supplied.

The operation of the stepper motor driver SMD-1.6 with DIN clamp is characterized by low vibration and noise. The driver is designed for smooth movement of the stepper motor with microstepping up to 1/128, provides excellent dynamics and high motor torque.

### Technical parameters

Voltage	12 - 24 VDC
Max. current per phase	0.1 - 1.6 A
Microstepping	1/1 - 1/128
Control methods	STEP/DIR, 0 - 10 VDC
Version	in an open housing with DIN clamp

### Control methods

- Pulse position control STEP/DIR
- Speed control via analog voltage signal 0..10 VDC or built-in potentiometer

### Dimensions
